

# FlexMoney™ Card

## Overview

Simplifying healthcare purchases is an important aspect of the HSA experience. FlexHSA participants have direct access to their funds through the FlexMoney™ Card MasterCard®.

Just like any other debit card, they swipe this card at the pharmacy or doctor's office to pay for healthcare expenses – tax-free – directly from the HSA. The FlexMoney™ Card is designed to accommodate today's consumers as it eliminates the hassle of writing a check or paying with cash at the time of purchase.

## How does it work?

Participants present the FlexMoney™ Card as payment for qualified goods and services, which will be paid directly from the HSA. This card works like any other debit card, except for two important differences:

- It cannot be used at an ATM or for "cash back" when making a purchase.
- There is no PIN, so although it is a debit card, participants should always choose credit when given the option between debit and credit.

## Advantages:

- ✕ No more check writing or out of pocket expenses.
- ✕ Online account access to real-time account information at [www.flexhsa.com](http://www.flexhsa.com).
- ✕ Payment for any healthcare purchases comes directly from the participant's FlexHSA.
